BRIT MILA: HATAFAT DAM

Brit Mila: Hatafat Dam

For a boy who requires an operation six months later (or more) to repair an anomalous condition such as hypospadias or webbing--if the hospital will allow a <u>mohel</u> "hands-on" participation, then the <u>brit mila</u> is done at the time of the operation.

If not, after the child heals, a *hatafat dam brit mila* should be performed.
