Spicy/Charif Soaking: Long Enough To Be Cooked: Food and Utensil

Food soaked in brine, vinegar, or any spicy liquid for long enough to be cooked if heated on a burner or in an oven will absorb or transfer gender or non-*kosher* status from/to any utensil used with it.

SITUATION	Neutral/ <i>pareve</i> food in brine, such as spicy pickles or spicy olives, sits in a container
	for long enough to become cooked.
STATUS	
	• If the container is <i>dairy</i> , the food will become <i>dairy</i> .
	• If the container is meat, the food will become meat.
NOTE	You may not eat this formerly <i>pareve</i> food with food of the opposite gender.
SITUATION	A pickle with spicy/ <i>charif</i> pickle juice is placed into a <i>dairy</i> utensil/container (even if unused) for long enough to become cooked.
STATUS	The pickle will become <i>dairy</i> and may not be eaten with meat.
NOTE	This example does not apply to any type of glass container.
NOTE	Food soaked in brine by a non-Jew does not become subject to bishul akum.
NOTE	Even if the utensil had not been used for more than 24 hours, a spicy/ <i>charif</i> food will
	"revive" the gendered or non-kosher taste in the utensil. The utensil will then make the
	food gendered or non-kosher. Consult a rabbi for possible exceptions.
