Shabbat Ends at Dark

You may not end <u>Shabbat</u> before dark (appearance of three medium-size stars--<u>tzeit ha'kochavim</u>). When Is Dark

Shabbat (and Jewish festivals) ends at "dark": when three medium-sized stars are visible overhead.

NOTE To find medium-sized stars, look for stars to appear in the west—those will be large stars. When large stars appear in the west, medium-sized stars should be visible overhead. If you are in a place where the sun sets but the sky will not get dark any time that evening, ask a *rabbi* what to do.
