

JEWISH FESTIVALS: INSECTS

Jewish Festivals: Insects that May Carry Diseases

You may kill mosquitoes and other insects on Jewish festivals if they carry deadly diseases, which makes the insects a danger (sakana). You may kill insects that might carry diseases even if you do not know for certain.

Jewish Festivals: Biting or Stinging Insects

If insects such as bees or non-diseased mosquitoes don't carry diseases but they bite or sting you, you may kill them on Jewish festivals, as well as trapping them or chasing them away with bug spray. Unlike on Shabbat, on a Jewish festival you may kill insects that are a nuisance, such as gnats or flies. These *halachalot* apply to all Jewish festivals unless they fall on Shabbat (or are Yom Kippur).
