Maror: What To Eat

The ideal bitter vegetable for *maror* at the *Passover seder* is horseradish. Horseradish for *maror:*

- Must be fresh enough to be sharp.
- Should be ground (if ground ahead of time, it must be stored in a covered container until the *seder*).
- Must not have liquid (horseradish with beets added is not suitable for use as *maror)*.

NOTE Many people have the custom to use romaine lettuce for *maror* (be careful to check for bugs on the romaine).
