Kashrut: Dairy/Meat: Pot Spatters and Pareve

SITUATION

- Food of one gender spatters onto the outside of a *pareve* utensil.
- Either the food and/or the utensil are hot.

NOTE If the pot is not hot, a small spatter will not be hot. If the spatter is large (more than one drop), the spatter may be hot. Ask a *rabbi* what to do.

STATUS The utensil assumes the spatter's gender UNLESS the spatter was less than 1/60th of the volume of the metal in the *pareve* utensil (not 1/60th of the volume the container usually holds). Consult a *rabbi*.
