MEASUREMENTS & QUANTITIES

PRAYER TIMES

Introduction to Prayer Times/Zmanim

To calculate prayer times (*zmanim*), divide the total hours of daylight (from sunrise to sunset) by 12. This gives the local "hour" length, called *halachic hour* (*sha'a zmanit*).

Individual Prayer Times

Plag HaMincha: 1 1/4 *halachic hours* before sunset until sunset.

NOTE <u>Plag ha'mincha</u> is usually calculated from sunrise to sunset. If necessary, an alternative calculation may be used from dawn to dark, which results in *plag ha'mincha*'s being somewhat later.

Mincha Gedola: 1/2 hour after halachic midday until 2 1/2 halachic hours before sunset.

Mincha Ketana: 2 1/2 halachic hours before sunset until sunset.

<u>Tzeit HaKochavim</u>: 36 to 72 minutes after sunset, depending on the opinion, purpose, and geographical location.

LENGTH/OBJECTS

Length/Objects

```
1 \underline{Tefach} = 4 fingers' width = 3 ½" (8 cm) to 4" (10 cm)

\underline{Lavud} = 3 \underline{Tefachim} = 10 ½" (27 cm) to 12" (30 cm)

1 \underline{Ama} = 6 \underline{Tefachim} = 21 ¼" (54 cm) to 24 1/2" (63 cm) (depending on the application)

10 \underline{Tefachim} = 40" (1 m) (for \underline{Shabbat} border)
```

DISTANCE

Distance

```
1 Mil = 0.7 miles (1.2 km) = 2000 amot
4 Milin = 1 parsa
1 Parsa = 4 mil = 2.8 miles (4.5 km)
```

<u>Dalet Amot</u> (4 cubits) = about 7 feet—minimum, 7 feet, 1 inch" (2.2 m); maximum, 8 feet (2.4 m)-but an entire dwelling may be considered your personal (*halachic*) *dalet amot*.

VOLUME/SOLID

Volume/Solid

K'Zayit

 $\underline{K'zayit}$ is variously defined as being the volume of 1/3, $\frac{1}{2}$, or 1 whole egg; 0.6 - 1.9 fl. oz. (18-56 ml), depending on the application.

NOTE For d'*oraita* requirements such as *seder*, we are stringent (*machmir*) and use the larger amount of 1.9 fl. oz. (56 ml). For d'*rabanan* rules, we are more lenient and use only 1.3 fl. oz. (39 ml, or 1/6 cup).

• K'zayit for Seder Matza and Afikoman: 1.9 fl. oz. (56 ml) of matza.

• K'zayit for <u>Bracha Achrona</u> and <u>Birkat HaMazon</u>: 1.3 fl. oz. (39 ml, or 1/6 cup) of solid food.

Beitza, K'Beitza

Beitza, K'Beitza = 1.9 fl. oz. (56 ml); an egg size by definition.

NOTE For an *etrog*, which must be at least 1 egg volume, today we use a minimum of 2 egg volumes.

VOLUME/LIQUID

Volume/Liquid

1 *Revi'it* = Usually 3.3 fl. oz. (99 ml); but 4 fl. oz. (119 ml) for:

- Any food requiring bracha_achrona.
- The four cups of wine at the seder.
- Kiddush for Shabbat and Jewish festival nights.

```
1 <u>Log</u> = Volume of 6 eggs = 4 <u>Revi'ot</u> (a <u>revi'it</u> is 1/4 of a <u>log</u>)
1 <u>Kab</u> = 4 <u>Login</u>
1 <u>Se'ah</u> = 6 <u>Kabin</u>
```

 $40 \underline{Se'ah}$ = Volume equivalent to 3 cubes, $24 \frac{1}{2}$ " (61 cm) on each side; minimum requirement for \underline{mikva} = about 192 gallons/750 liters

1 fl. oz. = 1.77 cu. inch (about the size of a golf ball)

MONETARY VALUE

Monetary Value

Shava Pruta: Value of a pruta coin; value of ½ a barley grain's volume in silver.

NOTE <u>Shava pruta</u> signifies the smallest usable amount of money. Since not much can be bought for 1 cent (or less!), a dime is about the value we should use as a minimum.
